

Safer Homes. Safer Home Owners. Happy Home Owners!

Who are we?

Founded in 2016 recognizing the growing need for slip resistance treatments, Florida Non-Slip has rapidly become the 'go-to' group for many Florida based businesses as well as residential customers. Our integrity and dedication to our client's safety have put us in a position to establish valuable and mutual beneficial relationships.

What do we do?

We help companies to fulfill their due diligence to ensure the safety of their environment, their staff and clients. Our floor treatment is a permanent solution to hazardous, (wet or dry) slippery floors, and will reduce the risk of dangerous slips and falls on almost any flooring surface. and minimize the potential for injury, lawsuits, litigation costs, and fatal falls.

What surfaces do we make safer?

Our treatments work on all types of surfaces including marble, granite, concrete, wood, ceramic and porcelain tiles, quarry tiles, terrazzo, marble, glazed brick, polished stone, porcelain and enamel bathtubs & showers. Our non-slip solution will create traction to all types of footwear - whether wet or dry, and does not affect the appearance of the treated surface (bathtub, shower ETC).

Does Florida Non-Slip currently work with Home Builders?

Yes! We currently work with home builders, big and small, in 3 different ways:

1. Luxury home builders

Luxury homes often feature ceramic tile, marble, granite and other surfaces that will become hazardous when wet. We treat those areas as well as pool decks and lanais etc. for the home owners and their families/guests by applying our proprietary non-slip treatment.

2. Homes of high net worth/high profile individuals

High net worth individuals often have live-in staff, and many vendors/contractors working in and around the property. Besides the safety of the residents, their staff, contractors, visitors and guests, treated surfaces offer an obstacle for potential lawsuits.

3. Active Adult/Active Lifestyle Communities.

Slip and fall accidents are a real threat to independent living. Slippery tubs, slippery showers or bathroom floors are a thing of the past after our treatment.

Why partner with us?

- ✓ We offer flexibility in pricing and markup. We will find a way that works for you!
- ✓ We bring all treated surfaces up to a Static Coefficient of Friction level beyond ADA and OSHA recommendations, and up to or surpass ANSI B101.1 standards.
- ✓ Bolster your reputation and product offering! The 3 mentioned target demographics, are typically very familiar with the dangers of slippery surfaces and the possible catastrophic results. Knowing that you, the builder, cares, is priceless to many, and shows true concern for personal safety.
- ✓ A minimum of a two year warranty on all treated surfaces.
- ✓ Residual income (optional). Just before warranty expiration, one of our expert installers will digitally test the treated surfaces, then discuss re-treatment of the previously treated areas as well as other potential areas of concern. Any further treatment ordered will be at retail price, with a to be negotiated percentage included for your organization.
- ✓ Expert technicians throughout the state of Florida, corporate partners in 40+ states.
- ✓ 100% customer satisfaction!

Contact us for a FREE demonstration today! If so desired, we will even treat one of your model homes for free! No Risk. No Obligation. No Cost.
